Fall 2026

Celebrating a Historic Milestone: Katelyn Nicholas Earns Her Journeyman Certificate

Katelyn's achievement marks a major milestone for Tremco CPG/WTI, as she is the first woman to successfully complete the apprentice program. Her dedication, determination, and commitment to learning have been evident throughout her journey.

"When I first started working at WTI, I had no prior experience in the blue-collar industry, so entering the roofing trade was completely new for me. Throughout the apprenticeship program, I've learned the trade from the ground up and gained hands-on experience that has helped me grow both on and off the job. I enjoy learning different roofing systems and seeing a project come together from start to finish. I'm grateful for the opportunities WTI has presented me and proud to continue growing in the trade."

Her accomplishment reflects both her hard work and an important step forward in expanding opportunities within the roofing industry. We look forward to her continued success.
