

TremSafe™ Rooftop Ladder Access System

Safety Solution for Rooftop Ladders

FEATURES

Non-penetrating

Assembles in minutes

Proprietary brackets attach to Rail to Rail, Rail to Flat, and Rail to Angle ladder frames

Adjustable front bar makes alignment of the rail to the frame a SNAP

Available in two finishes: Powder Coat Safety Yellow, Hot-Dip Galvanized

Fully compliant with all OSHA standards.

DESCRIPTION

The TremSafe Rooftop Ladder Access System™ is a cost effective product for providing a controlled zone to an access ladder. It allows you safe egress/ingress to and from the ladder. Our unique design incorporates our finishing rail which allows our system to span a parapet wall. The TremSafe Self-Closing Safety Gate is available as an option. The gate should be mounted on the rail sections farthest from the ladder. This creates a safe environment at the ladder by reducing the possibility of the gate closing on hand. We have three types of brackets for mounting to the ladder frame: Rail to Round, Rail to Flat Bar and Rail to Angle Iron.

BASIC USES

A passive fall safety solution for permanent rooftop access ladders.

TremSafe Rooftop Ladder Access System

MAIN FEATURE

The TremSafe Rooftop Ladder Access System is intended as a stand alone product for roof access egress.
